# MFManager User Guide

This document is designed to guide "MFManager(My Financial Manager)" mobile application users to get started on the app. The instruction includes

1. how to download and install the application
2. how to get started on MFManager

## What is MFManager?

MFManager is an Android mobile application which helps the user keep track of all the expenditures and earnings by recording them. It also provides the function that transfers balance of one account to another.

**Warnings: This application can only be run on an Android device. It is NOT supported in iOS, or Windows Phone.**

## What is needed to start using the app?

In order to download the application, have your Android phone ready.

## How To Download And Install The Application

These steps will walk you through the process of downloading the app from Github.

1. Open the web browser and visit https://github.com/czebahi/My-Financial-Manager

2. Click **app** folder (see Figure 1)

Figure1

3. Click **release** folder (see Figure 2)

Figure 2

4. Click **app-release.apk** file (see Figure 3)

Figure 3
